

## EVALDAS LAURECKAS

### PROFILE

Date of birth: 25/11/1990

Marital Status: Married

Email: [evaldas.laureckas@gmail.com](mailto:evaldas.laureckas@gmail.com)

Mobile: +37067350586

Website: <https://piratuks.github.io/portfolio/dashboard>

Driving licenses: B, more than 12 years

Nationality: Lithuanian

City: Klaipėdos r.

Address: Slengių village, Žvaigždyno 11-2

### KEY QUALIFICATIONS

Master's degree in marine engineering and bachelor's degree from the faculty of natural science, mathematics computer science department. I am an Innovative software engineer offering over ten years of experience in the entire software development lifecycle – from concept through delivery of applications and customizable solutions. I have been developing a system for KRATC, CB&I (USA), HMSREG (Oslo Kommune), VaultSpeed, GoodTill, Banks, Chevron, and an in-house business system. I can analyse code and engineer well-researched, cost-effective, and responsive solutions. Expert in .NET (VB.NET & C#), Xamarin forms, ASP.NET, PHP, Android (Java), TypeScript, JavaScript (jQuery, Angular, Bootstrap, Node, KnockoutJS, Vue, React), WebSocket's, Ajax, HTML/CSS (SASS, Less, SCSS), MySQL, Microsoft T-SQL, MongoDB, Trello, Jira, MVC (Model, view, controller. Domain-driven design), Ionic framework, Cordova, Objective-c/swift, UIAutomation, speech integrations, FE modern frameworks.

I can quickly acquire the knowledge you need for the task at hand.

Experience:

- Analysing end-user needs and then developing software to meet their needs.
- Developing features across multiple applications.
- Reviewing code for quality and adherence to standards.
- Respond promptly to reports of bugs.
- Service level reporting.
- Communicating technical concepts.
- Maintaining proper software configuration management.
- Ensuring proper source code documentation.
- Continuous deployment.
- Have experience in fully remote jobs/positions.
- Experience in leading the team.
- Experience in teams within Enterprise / Start-up setup.

### EMPLOYMENT EXPERIENCE

**Company Name: Chevron Corporation (USA, Remote Job, Individual activity certificate)**

***December 2022 – Present***

**Application Engineer**

Maintenance of existing project. Testing, designing, and developing new projects in a team and alone. Work with JavaScript, node.js, angular 13, SASS/SCSS, Rest API, OAuth, Azure DevOps, angular material, Typescript, Python, Docker, Unit tests, Cypress, ngRx state management, Leaflet, microservices, stac-api.

Projects are undertaken with Chevron Corporation:

- Chevron Atlas – project which combines a rapidly growing catalog of Chevron-owned geospatial data with intuitive APIs, interactive exploration, and searchability to provide users with valuable insights into their data

**Company Name: Danske Bank A/S (Danish Bank, Remote Job, Individual activity certificate)**

***February 2021 – December 2023***

**Senior Frontend Developer**

New project creation is a platform for risk officers to manage requirements presented to companies / individual persons as manual or automated questionnaires based on companies/person country's laws. Work with angular, ajax, HTML, CSS, jQuery, JavaScript, Node.js, Azure (pipelines), SASS, Restful, Typescript, angular material, OpenShift, .NET, Unit tests, Selenium, SonarQube, BlackDuck, Docker, Cypress, react, redux, ngRx state management, Saphire (company's react framework).

Projects are undertaken with Danske Bank A/S:

- Anti-money laundering project (tribe) - Requirement management squad, a key name for the project is Cobra CRA. The platform for risk officers to create/edit/review requirements, and contexts. Option to publish/archive it, versioning of requirements.
- Anti-money laundering project (tribe) – Transactional Assessment squad. Customizable platform for case handlers which enables to perform the efficient transactional assessment.

**Company Name: VaultSpeed / The Agile Information Factory (Belgium Company, Remote Job, Individual activity certificate)**

***August 2019 – February 2023***

**Fullstack JavaScript Developer / Lead Frontend Developer**

Maintenance of existing project. Testing, designing, and developing new projects in a team and alone. Work with JavaScript, node.js & express, angularjs/angular2+, gulp, SASS/SCSS. Rest API, OAuth, Slack, Bitbucket, Git, Jira, Vis.js, semantic-ui, SCRUM, Big Data, Data Warehouse, Data Vault 2.0, Postgres, SQL Server, Oracle, T-SQL, Typescript, Monaco editor integration with custom language, mxGraph integration, Monaco editor integration, Unit tests, Selenium tests, loopback 4, angular material, ngRx state management.

Projects are undertaken with VaultSpeed:

- Lots of improvements, features implementations, performance optimizations, and bug fixes under the company's leading product/platform for Data Vault 2.0.
- Customer support, respond to customer complaints/issues, and deal with them.
- Multiple dynamic, intuitive, user-friendly, graphical interface components implemented under canvas: Code names: Source Object Graphical Overview Editor, Satellites Split Graphical Editor, Bridges Graphical Editor, Template Graphical Editor, Source Data Vault Visualizer, Data Vault Graphical Editor.
- VaultSpeed studio.
- Pull request reviews, guiding other developers.
- Open-source project contributions.
- Project migration from angularjs to angular 12.
- Graphical component migrations from vis.js to mxGraph.
- API rework using loopback 4 to construct Restful.
- Loopback 4 API maintenance.
- Angular 12 FE maintenance.
- Participation in interviews for new Employees.

**Company Name: Elsis Pro (Lithuanian Company, Remote Job, Individual activity certificate)**

***August 2020 – April 2021***

**Fullstack JavaScript Developer**

Three of the products were running on old technologies. My primary investment in these projects was to upgrade the FE side with modern frameworks and ditch the Java (desktop app). Work with DevExtreme framework, angular, Java, Ajax, ActionScript, JBoss, Java Spring, HTML, CSS, jQuery, JavaScript, Node.js, Git, SASS, Restful, Typescript, Bootstrap, Python, SVN, SOAP.

Projects are undertaken with Elsis Pro:

- Project code name (G/On Management) upgrade FE side. Migration from Java technology to Angular 10.
- Project code name (G/On Config) upgrade FE side. Migration from Java technology to Angular 10.
- Project code name (ENMA / EGNOS / NNMI – network node manager) upgrade from adobe Flash / ActionScript (which is not supported anymore) to modern FE framework Angular 11. Also, keep the old BE with Java SOAP (the client requested). However, a wrapper with REST was created, which acted as a bridge between REST and SOAP.

**Company Name: The Good Till CO LTD (UK Company, Remote Job, Individual activity certificate)**

*June 2018 – July 2019*

**App Developer**

Maintenance of existing project. Testing, designing, and developing new projects in a team and alone. All projects are designed for mobile devices. Most of them are for iOS, and a couple is for both Android and iOS. Work with the ionic framework, angularjs/angular2+, firebase, bugsnap, web socket/sync, Cordova, web packs, java, Objective-c/swift, Ajax, HTML, CSS, jQuery, JavaScript, Node.js, Git, SASS, Gulp, PHP, Laravel, Vagrant, Restful, MySQL, Typescript.

Projects are undertaken with The Good Till CO LTD:

- A developer of the company's main product, the POS system (Based point of sale system).
  - iOS version -> <https://itunes.apple.com/lt/app/goodtill/id1116407057?mt=8>.
- A developer of the company's sub-project, such as an admin app.
  - iOS version -> <https://itunes.apple.com/lt/app/goodtill-admin/id1218479938?mt=8>.
  - Android version -> <https://play.google.com/store/apps/details?id=com.thegoodtill.admin>
- A developer of the company's sub-project such as the loyalty app.
  - iOS version -> <https://itunes.apple.com/lt/app/goodies/id1434560257?mt=8>
  - Android version -> <https://play.google.com/store/apps/details?id=com.thegoodtill.loyalty>
- A developer of company sub-project order & collect app.
  - <https://weborder.thegoodtill.com/>
- Integrations with Square payment, Curl payment systems, iZettle payment systems, Yoyo payment systems, Fourth Hospitality system, and other popular payment systems.

**Company Name: PCByVoice LTD (UK Company, Remote Job, Individual activity certificate)**

*August 2018 – February 2019*

**Developer**

Maintenance of existing project. Testing, designing, and developing new projects in a team and alone. Projects are a target for disabled people. They can use browsers/windows with only voice, etc. Work with UIAutomation, speech integrations, C#, SQL, JavaScript, CSS, SASS, jQuery, HTML, and Git.

Projects are undertaken with PCByVoice LTD:

- A developer for Firefox and Chrome extensions called pcbynumbers. This extension repeatedly checks the active page. It marks all the page elements by numbers (these numbers are added under the page's layout. The style, opacity, colors, etc., are possible to change by the user). There is an active function under this extension. You use that active function by saying you want to use the number 4 from the page. This function focuses on the clicks mentioned number. This extension is integrated with the company's speech integration which makes it possible to use the extension by voice.
- A developer for the application called SpeechStart Pro. It allows using windows for hands-free users. It is marking each element on the active window with numbers that are activated by voice commands. Voice commands are coming from the company's speech integration. The old version can be checked here <http://www.pcbyvoice.com/shop/pcbyvoice-speechstart-plus/>

**Company Name: STMCB Limited t/a Inspiratia (UK Company, Remote Job, Individual activity certificate)**

*March 2018 – August 2018*

**Fullstack .NET Developer**

Maintenance of existing project. Testing, designing, and developing new projects in a team and alone. Work with .NET (ASP, C#, Visual basic), SQL/T-SQL, Rest web services, Entity Framework, Linq (Linq to SQL), Ajax, HTML, CSS, LESS, jQuery, JavaScript (ECMAScript 6), KnockoutJS, SSAS, Node.js, Gulp, Git, TFVC, Jira, MVC (Model, view, controller. Domain-driven design).

Projects are undertaken with Inspiratia:

- A developer of in-house systems.
  - <http://icms.inspiratia.com> -> in house CMS,
  - <http://sms.inspiratia.com/> -> in house CMS,
  - <https://www.inspiratia.com/> -> main project

**Company Name: UAB “Omega Technology” Norwegian company (Omega AS, Onsite Job, Employment)**

***March 2013 – June 2018***

**Software Systems Engineer**

Maintenance of existing products. Testing and Corrections of issues for new and old projects. Design and implementation of new projects in teamwork and alone. Maintenance of company framework. Work with VB.NET, C#, ASP.NET, Ajax, JavaScript, HTML, CSS, Less, Razor’s script, Microsoft SQL Server, Appframe (Framework of the company), DevExpress, Bootstrap, jQuery, Flexpaper, customized Angular, Xamarin.

Projects are undertaken with UAB “Omega Technology”:

- A developer for the KRATC project. This was a website and WinForms application for the Urban Waste Centre of Klaipėda Region. The project aimed to implement an automatic invoice generator and management of the invoices. It has been created <https://mano.kratc.lt> for KRATC customers and a windows application for KRATC.
- A developer for the DCS (document control system) for “Statoil” (a Norwegian multinational oil and gas company). The project’s purpose was to implement a document review, approval, history, and management system.
- A developer for the MCE project. The project aimed to implement an automatic schedule generator and document manager.
- A developer for the Pims TAP project. The created solution is to export data from SharePoint and import it into the project’s database based on tables. I merged multiple databases into one.
- Was responsible for the three specific parts of the company framework. Worked with DevExpress reports and WinForms, dlls, websites, and web technologies such as jQuery, JavaScript, Bootstrap, ASP.NET, CSS, HTML, and Ajax.
- Was responsible for a Web site that includes an issue tracker, team docs, agenda, etc. The website used a framework and was used by Omega. Clients use different site versions. I had to support all versions. Technologies: JavaScript, Bootstrap, Font-Awesome, ASP.NET, CSS, HTML, LESS, Aspose, etc.
- A developer for a Cost Management system dedicated to CB&I. This was mainly the WinForms solution. However, there were some small website apps.
- A developer for the in-house app called Connect Omega.
- A developer for the HMSREG project (Oslo Kommune). Was responsible for mobile applications. These applications were built on cross-platform (Xamarin forms) for iOS and Android. Also helped implement a website and windows client for HMSREG based on Omega’s framework.
  - Android version - > [Android APP](#)
  - iOS version -> [IOS APP](#)

**Company Name: Launchmen (USA Company, Remote Job, Individual activity certificate)**

***January 2015 – February 2015***

**Web Developer**

Maintenance of existing project. Testing, designing, and developing new projects in a team and alone. Work with PHP, JavaScript, Ajax, HTML, CSS, LESS, jQuery, CakePHP, Photoshop, and Repository systems such as GitHub, and WordPress.

Projects are undertaken with Launchmen:

- A developer of Business Miracles Site Document – a small advertising website <http://www.businessmiracles.com>.
- A developer of Funnel – a small advertising website.
- A developer of a couple of small, simple pages Slice/Code.

**Company Name: UAB “Omega Technology” Norwegian company (Omega AS, Onsite Job, Employment)**

***June 2012 – August 2012***

**The Trainee Programmer / Tester**

Software testing and its development, using .NET programming language and database. Company framework improvement works. Work with company framework, SQL Server, .NET, Android.

Projects undertook while with UAB “Omega Technology”:

- Created quality assurance application prototype for Android. This prototype had three parts. The First part is an Android application, the second part is a web service written in .NET, and the third part is the SQL server database. The purpose of this application is to quickly checklist of specific objects with a mobile phone or touchpad to ensure that things meet their requirements.

**Company Name: VŠĮ Technology and Business School (Onsite Job, Employment)**

*September 2012 – September 2012*

**Web Developer**

Development of a new website for the school. Work with PHP, MYSQL, JavaScript, HTML, CSS, Yii framework, and jQuery.

Projects are undertaken with VŠĮ Technology and Business School:

- Created the website of a school. The purpose of this project is to represent the school and its information through a website.

**Company Name: Construction companies (Onsite Job, Employment)**

*June 2009 – August 2009*

**The auxiliary worker**

Auxiliary worker for construction companies at construction sites.

Projects undertook while with Construction companies:

- One of the builders helped build a house in Šventoji.

**EDUCATION**

**Faculty of Marine engineering**

2013-2015

Master's degree of Engineering of Technological Information Systems

**Faculty of natural science and mathematics computer science department**

2009-2013

Bachelor's degree in informatics

**Kretinga Marijonas Daujotas secondary school**

1997-2009

Mid degree.

**CERTIFICATES**

70-461 Querying Microsoft SQL Server 2012/2014 – Passed, Score 700

**PUBLICATIONS**

Business Process Modelling and Simulation: Aspect of Resources Modelling Problems. <http://jmk.infotech.vgtu.lt/>

Analysis of Using Resources in Business Process Modelling and Simulation <https://ortus.rtu.lv>

**LANGUAGES**

- Lithuanian (Mother tongue)
- English (fluent written and oral, C1-Advanced)
- Russian (basics)
- German (basics)

**LINKEDIN**

<http://www.linkedin.com/in/evaldas123456>

## **GITHUB**

<https://github.com/piratuks>

## **PERSONAL INTERESTS**

I have a keen interest in IT and improve my knowledge outside of work (playing with different technologies, reading books/blogs, etc.). I participate in extreme activities such as bungee jumps, skydiving, snowboarding, etc.
